

IRMACS Interdisciplinary Colloquium Series

DEDICATED TO THE RECENT RECIPIENTS OF THE DISCOVERY
ACCELERATOR SUPPLEMENTS PROGRAM

The Discovery Accelerator Supplements (DAS) Program provides substantial and timely resources to a small group of researchers whose research proposals suggest and explore high-risk, novel or potentially transformative concepts and lines of inquiry, and are likely to have impact by contributing to groundbreaking advances in the area. In particular, for the purposes of the DAS Program, a superior research program is one that is highly rated for originality and innovation. The timeliness of DAS support represents the potential for the researcher at this time to capitalize on an opportunity, such as a recent research breakthrough, a paradigm shift or a new strategy to tackle a scientific problem or research question.

SPRING 2013
The IRMACS Centre
11:30AM – 12:30PM
ASB10900

*Light refreshments will be served
after each talk.*

- Jan 18 Dr. Mohamed Hefeeda, School of Computing Science, SFU
** Please note: Seminar on Jan 18 will run from 10:00AM – 11:00AM **
- Feb 1 Dr. Daniel B. Leznoff, Department of Chemistry, SFU
- Mar 1 Dr. Lynne Quarmby, Department of Molecular Biology and Biochemistry, SFU
- Mar 15 Dr. John Stockie, Department of Mathematics, SFU
